

### BEONTRA – Let your career take off!

With the BEONTRA Scenario Planning software solutions our customers are constantly "ON TRACK" which enables them to think "BEYOND TRAFFIC". Our solutions provide ideal conditions for the simulation and evaluation of planning scenarios covering areas such as traffic, capacity, revenue and investment. With our innovative products we keep the world in motion – for over 15 years we have been dedicated to developing software solutions in a fast-paced environment, providing cutting edge technology to help our 60+ clients manage airport traffic. BEONTRA reflects the kind of company our people stand for: vibrant, human, fun but focused, globally acting but locally rooted.

As we continue to grow we are currently looking for an **Aviation Consultant (m/f)** to add to our Consulting Team in Karlsruhe.

#### Key responsibilities

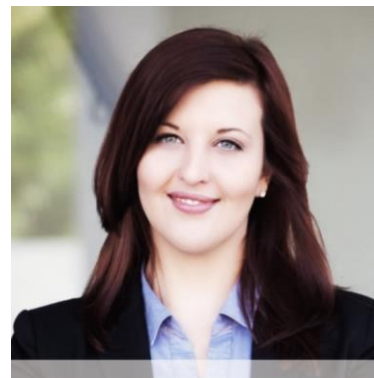

- Management of software implementation projects within scope, timeframe and budget in the aviation industry
- Analyze data situations and establish processes for different airports
- Design and delivery of key stakeholder and end user training – demonstrating how the BEONTRA Scenario Planning suite can add value to clients processes
- Document general business cases out of industry-wide information and project experience, passion for transforming business through enabling technology and focusing on solution and service delivery

#### Requirements

- Degree in computer science/engineering/aviation management/logistics or equivalent experience in the aviation and transport industry
- Minimum of 2 years' experience in implementing and managing software solution projects
- Passion for the aviation industry, drive to improve and proactivity
- Confident appearance and assertiveness, excellent communication and presentation skills as well as analytical thinking
- Excellent English skills, German language skills an advantage
- Readiness for extensive travel (30%)

#### What we offer

- Challenging projects in the aviation industry with scope for introducing your own ideas and experience, interdisciplinary collaboration with motivated teams within an agile and dynamic framework
- Permanent position, individual career paths, flexible working hours
- Modern corporate culture with strong team spirit, flat hierarchies, knowledge sharing and staff events
