

BEONTRA – Let your career take off!

With the BEONTRA Scenario Planning software solutions, our customers can constantly “BE ON TRACK” which enables them to think “BEYOND TRAFFIC”. Our solutions provide ideal conditions for the simulation and evaluation of planning scenarios covering areas such as traffic, capacity, revenue and investment. We keep the world in motion with our innovative products – for over 15 years we have been dedicated to developing software solutions in a fast-paced environment, providing cutting edge technology to help our 60+ clients manage airport traffic. BEONTRA reflects the kind of company our people stand for: vibrant, human, fun but focused, globally acting but locally rooted.

Aviation Consultant (f/m/d)

Karlsruhe, Germany

Key responsibilities

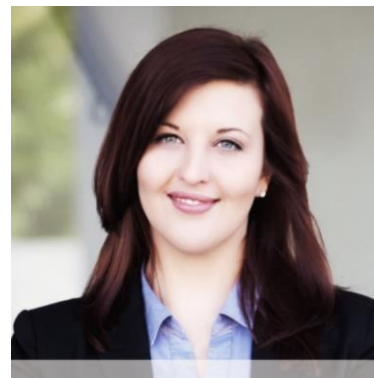

- Analyze data situations and establish processes for different airports
- Design and delivery of key stakeholder and end user training – demonstrating how the BEONTRA Scenario Planning suite can add value
- Collaboratively act as a stakeholder to the further development of the BEONTRA product suite, supporting how your experiences are being translated to tangible features and products
- Elaborate use cases to deal with individual workflows and settings, document general business cases out of industry-wide information and project experience
- Passion for transforming business through enabling technology and focusing on solution and service delivery

Requirements

- Degree in computer science/ engineering/ aviation management/ logistics or equivalent experience in the aviation and transport industry
- Minimum of 2 years’ experience in implementing and managing software solution projects
- Passion for the aviation industry, drive to improve and proactivity
- Confident appearance and assertiveness, excellent communication and presentation skills as well as analytical thinking
- Excellent English skills, German language skills an advantage
- Readiness for extensive travel (30%)

What we offer

- Exciting projects in the aviation industry with a scope for introducing your own ideas and experience, interdisciplinary collaboration with motivated teams within an agile and dynamic framework
- Permanent position, individual career paths, flexible working hours
- Modern and appreciative corporate culture with strong team spirit, flat hierarchies, knowledge sharing and staff events
